My Opinion for what it is worth

I hope that the book is thrown down HARD against Microsoft and the extremely monopolistic practices they have used to stifle innovation and restrict trade with their products.

I feel that the best remedy would be to dis-integrate Internet Explorer, Outlook Express, Microsoft Messenger, Office and any number of other programs from Windows, and second, To publish every hook, API and call used to integrate Internet Explorer, Office, Microsoft Messenger, Outlook Express and every other program Microsoft has bundled with it's operating system.

Again, My opinion for what it is worth.
